

PROJECT: TEAM FORMATION
SPRINT-1 Retrospective

SPRINT-1 Schedule :

Sprint 1 Planning : 23rd Sep to 27th Sep

Sprint 1 : 30th Sep to 4th Oct

SPRINT-1 Goal :

The goal for this sprint was to develop and implement functionalities for professors when logged into the application. This includes creating a secure login page that allows professors to authenticate using their Tamu credentials. Once logged in, professors will be able to create and customise a student data collection form, define and add specific attributes to the form, and set deadlines for the project. Additionally, they will have the capability to modify these settings as needed. By the end of this sprint, professors should have a fully functional interface that enables them to effectively manage team formation criteria.

Team and Member Contributions :

Team formation team consists of 8 members. The tabular representation shows the roles, efforts and fair share effort (%).

Team Member	Role	Tasks Completed	Story points (Effort)	Total no. of hours worked	Fair share percentage(%)
Sahithi Duppati	Product Owner	1	3	18	12.5%
Phani Jyothi K	Scrum Master	3	2.5	14	12.5%
Uday M	Developer	3	8	48	12.5%
Ramya G	Developer	3	7	42	12.5%
Rithika S	Developer	2	6	36	12.5%
Sai Jaideep M	Developer	2	8	48	12.5%
Raja Karthik V	Developer	7	4.5	26	12.5%
Hitha MV	Developer	4	7.5	44	12.5%

SPRINT-1 Achievements :

As a professor, I want to securely log in with my college-issued username and password to manage student information for team formation. I need the ability to create and edit forms, add specific attributes or questions, and set weightage for each attribute to prioritize factors in the team formation algorithm. I also want to preview forms before finalizing them, duplicate existing forms for different classes or semesters, and set deadlines for form submissions while ensuring error handling for invalid deadlines. Additionally, I want to upload an Excel file to add student details efficiently.

SPRINT-1 Backlog Items and Status:

Sprint-1 Backlog Items	Status
Login with Username and Password	+
Create New Form with Edit	+
Add Specific Attributes with Remove	+
Set Attribute Weightage with Modify	+
Preview Form	+
Duplicate Form	+
Set Deadline for Form Submission with error handling	+
Add Students	-
Save as Draft	*
Integrations among features and deployment	+

- **Add students (-)** functionality was implemented but only small UI modification was pending due to misinterpretation.
 - **Save as Draft (*)** functionality was initially under planning but once development began, there was a slight change in workflow and the form remains as a draft until it gets published, so we edited that item out for this sprint as publish item was not picked for this sprint.
-

Design Diagrams for SPRINT-1 :

A design diagram for a login page. It features a window titled "Loginpage" with three window control buttons (minimize, maximize, close) in the top right corner. The main content area contains a large rectangular box with the text "Welcome to Team Form !". Below this is another large rectangular box containing a login form. The form has two input fields: "Email" and "Password", followed by a "Submit" button. At the bottom left of the form box is a link labeled "Forgot Password".

Hand-drawn wireframes for a "Team formation" interface. The top wireframe shows a box titled "Team formation" with a button labeled "Create New form". A red arrow points from this button to the bottom wireframe. The bottom wireframe shows a box titled "Team formation" with two input fields: "Form title" and "Form description", each with a placeholder "Enter text". Below these fields are two buttons: "Create form" and "Cancel". A red arrow points from the "Create form" button back to the top wireframe, indicating a loop or confirmation step.

Documentation of changes :

Initially the app was deployed on <https://fathomless-anchorage-60590-5aba8fd6be02.herokuapp.com/> but due to some technical issues the deployment link got changed to this: <https://team-formation-be0f7e7d165b.herokuapp.com/>.

SPRINT-1 MVP Demo Summary:

The product owner has presented a demo of Sprint-1 MVP with the client over a scheduled meeting.

Meeting Link : <https://tamu.zoom.us/my/snritchey>

Summary :

The client has requested the "Add Students" button, for which the functionality has already been implemented, but the user interface still needs to be added. Client emphasised the importance of developing the student-side of the project and incorporating course management functionalities in the upcoming sprints. Additionally, the client has requested access to the deployed Heroku app and has expressed satisfaction with the progress made so far. The next steps involve finalising the user interface for the "Add Students" button, along with completing the student and main logic implementations to facilitate team formation among students, thereby enhancing the application's overall functionality.
